

DIGITAL LEARNING EMPOWERING PEOPLE

At MLevel, we believe in the value of the learner and their ability to master their craft, and we've got the tools and analytics to make that mastery happen. We've seen a range of learning struggles that insurance companies face. Consider us your learning technology experts; let us help you make your people and business succeed and grow.

JOB MASTERY IS POSSIBLE

We think of learning as continual process. We call those steps the Three Pillars of Learning: knowledge transfer, reinforcement, and assessment. With our platform and this 360° learning theory, other insurance companies have found success with:

- o Approachable training for all types of employees.
- o Formatting that is best for regulatory scrutiny and compliance education.
- o Product knowledge retention and improved soft skills with sales team.
- o Modules being completed quickly, making the most of downtime.
- o Digital and mobile accessibility makes training global and scalable.
